Tweet

Series of bath sanitary taps of Ritmonio.BATH collection
design Lana + Savettiere.

Nature. SWEET, NATURAL, CONFIDENTIAL. Tweet has a friendly and gentle attitude, with a natural disposition for the interaction between people and ambient, whom it speaks spontaneously with. Its green sensitivity reveals both with its spirit of preservation for the environment and with an aesthetic choice inspired by the colours of nature.

Description. Tweet is a project of the Turin design studio Lana+Savettiere, born by the company brief to simplify the dialogue tap-person, to tempt the contact and to spur to a positive attitude.

A Natural Heart collection: not only eco, but *I LOVE ECOplus*, as, besides the reduced flow rate, when the lever is in the central position, you only get cold water and not premixed, avoiding in this way the turning on of the boiler each time you move the lever, also when the use of the hot water is not necessary. This allows a real energy saving.

A Eco Friendly gesture, that is translated in a *Friendly Usability* design, as responsible actions never represent a bigger effort for the daily: so a simply fold on the lever invites to a responsible acting.

The green vocation of the series, is also underlined by the finishings of the levers. Tweet is *Natural Colours*: the lever besides the chrome and brushed finishings, declines into five different colourings inspired by the changeable tonalities of the natural elements.

An expressive and immediate series to closed in a Tweet.

Available finishings:

Chrome, brushed; possible to couple with lever in chrome, brushed, painted in talco, brina, tufo, agave and tabacco colour
